

National Tracking Poll #2204144
April 22-25, 2022

Crosstabulation Results

Methodology:

This poll was conducted between April 22-April 25, 2022 among a sample of 2004 Registered Voters. The interviews were conducted online and the data were weighted to approximate a target sample of Registered Voters based on gender, age, race, educational attainment, and region. Results from the full survey have a margin of error of plus or minus 2 percentage points.

Table Index

1	Table CPA1: <i>As you may know, an importer can avoid paying duties, taxes, and minimize chance of inspection by U.S. Customs and Border Protection if they declare the value of their shipment does not exceed the U.S. 'de minimis value'. Currently, the U.S. de minimis value is \$800, meaning importers who declare their shipment is worth \$800 or less are exempt from formal customs procedures and can enter the country duty-free, are not subject to taxes, and are less likely to be inspected by U.S. Customs and Border Protection. Since 1995, Congress has increased the U.S. de minimis value from \$5 to \$800. Do you support or oppose Congress lowering the de minimis value?</i>	6
2	Table CPA2_1: <i>As a reminder, an importer of foreign-made goods can avoid paying duties, taxes, and minimize chance of inspection by U.S. Customs and Border Protection if they declare the value of their shipment is below the U.S. de minimis value. The U.S. de minimis value is currently \$800, meaning goods valued at \$800 or less are exempt from formal customs procedures and can be imported into the United States duty-free, are not subject to taxes, and are less likely to be inspected by U.S. Customs and Border Protection. How important is it, if at all, for the U.S. to prohibit certain countries that pose a threat to the following from being able to import foreign-made goods to the U.S. under the de minimis value? U.S. industries</i>	10
3	Table CPA2_2: <i>As a reminder, an importer of foreign-made goods can avoid paying duties, taxes, and minimize chance of inspection by U.S. Customs and Border Protection if they declare the value of their shipment is below the U.S. de minimis value. The U.S. de minimis value is currently \$800, meaning goods valued at \$800 or less are exempt from formal customs procedures and can be imported into the United States duty-free, are not subject to taxes, and are less likely to be inspected by U.S. Customs and Border Protection. How important is it, if at all, for the U.S. to prohibit certain countries that pose a threat to the following from being able to import foreign-made goods to the U.S. under the de minimis value? American workers</i>	14
4	Table CPA3: <i>As a reminder, an importer of foreign-made goods can avoid paying duties, taxes, and minimize chance of inspection by U.S. Customs and Border Protection if they declare the value of their shipment is below the U.S. de minimis value. The U.S. de minimis value is currently \$800, meaning goods valued at \$800 or less are exempt from formal customs procedures and can be imported into the United States duty-free, are not subject to taxes, and are less likely to be inspected by U.S. Customs and Border Protection. Currently, an estimate of 2.7 million shipments per day enter the United States under the de minimis threshold. Which of the following actions, if any, do you think U.S. Congress should take?</i>	18

- 5 **Table CPA4_1:** *As a reminder, an importer of foreign-made goods can avoid paying duties, taxes, and minimize chance of inspection by U.S. Customs and Border Protection if they declare the value of their shipment is below the U.S. de minimis value. The U.S. de minimis value is currently \$800, meaning goods valued at \$800 or less are exempt from formal customs procedures and can be imported into the United States duty-free, are not subject to taxes, and are less likely to be inspected by U.S. Customs and Border Protection. How concerning, if at all, are the following statements? Since Congress raised the U.S. de minimis value to \$800, China has been able to increase imports into the United States by avoiding paying duties, taxes, and inspections on foreign-made goods declared to be \$800 or less. Increased imports have caused the U.S. to become dependent on China for goods that are critical to the U.S. economy and U.S. national security.* 23

- 6 **Table CPA4_2:** *As a reminder, an importer of foreign-made goods can avoid paying duties, taxes, and minimize chance of inspection by U.S. Customs and Border Protection if they declare the value of their shipment is below the U.S. de minimis value. The U.S. de minimis value is currently \$800, meaning goods valued at \$800 or less are exempt from formal customs procedures and can be imported into the United States duty-free, are not subject to taxes, and are less likely to be inspected by U.S. Customs and Border Protection. How concerning, if at all, are the following statements? 90% of intellectual property package seizures come through international mail, with 83% of these packages coming from China. The current U.S. de minimis value has allowed China to import a greater amount of goods into the United States with less likelihood of an inspection from U.S. Customs and Border Protection.* 27

- 7 **Table CPA4_3:** *As a reminder, an importer of foreign-made goods can avoid paying duties, taxes, and minimize chance of inspection by U.S. Customs and Border Protection if they declare the value of their shipment is below the U.S. de minimis value. The U.S. de minimis value is currently \$800, meaning goods valued at \$800 or less are exempt from formal customs procedures and can be imported into the United States duty-free, are not subject to taxes, and are less likely to be inspected by U.S. Customs and Border Protection. How concerning, if at all, are the following statements? Most packages that pose a threat to U.S. intellectual property are imported to the U.S. from the online marketplace under the de minimis value, meaning they avoid paying duties, taxes, and minimize chance of inspection.* 31

- 8 **Table CPA4_4:** *As a reminder, an importer of foreign-made goods can avoid paying duties, taxes, and minimize chance of inspection by U.S. Customs and Border Protection if they declare the value of their shipment is below the U.S. de minimis value. The U.S. de minimis value is currently \$800, meaning goods valued at \$800 or less are exempt from formal customs procedures and can be imported into the United States duty-free, are not subject to taxes, and are less likely to be inspected by U.S. Customs and Border Protection. How concerning, if at all, are the following statements? In 2021, the United States hit a trade deficit of \$1 trillion, meaning the value of imports in the U.S. was \$1 trillion more than the value of exports resulting in the loss of American jobs. This deficit does not include foreign-made goods imported under the de minimis value because the U.S. government does not calculate the value of the 2.7 million shipments that are imported daily under the de minimis threshold.* 35

- 9 **Table CPA4_5:** *As a reminder, an importer of foreign-made goods can avoid paying duties, taxes, and minimize chance of inspection by U.S. Customs and Border Protection if they declare the value of their shipment is below the U.S. de minimis value. The U.S. de minimis value is currently \$800, meaning goods valued at \$800 or less are exempt from formal customs procedures and can be imported into the United States duty-free, are not subject to taxes, and are less likely to be inspected by U.S. Customs and Border Protection. How concerning, if at all, are the following statements? Non-market economies do not rely on market forces to allocate goods and determine prices. China is both a non-market economy and on the U.S. Trade Representative’s Priority Watch List due to disregard for intellectual property laws. Under the current de minimis value, vendors in China are able to avoid paying duties, taxes, and inspections on foreign-made goods by declaring their shipment is valued at less than \$800.* 39

- 10 **Table CPA5:** *As a reminder, an importer can avoid paying duties, taxes, and minimize chance of inspection by U.S. Customs and Border Protection if they declare the value of their shipment does not exceed the U.S. ‘de minimis value’. Currently, the U.S. de minimis value is \$800, meaning importers who declare their shipment is worth \$800 or less are exempt from formal customs procedures and can enter the country duty-free, are not subject to taxes, and are less likely to be inspected by U.S. Customs and Border Protection. Since 1995, Congress has increased the U.S. de minimis value from \$5 to \$800. Knowing more, do you support or oppose Congress lowering the de minimis value?* 43

- 11 **Table CPA6_1:** *As a reminder, an importer of foreign-made goods can avoid paying duties, taxes, and minimize chance of inspection by U.S. Customs and Border Protection if they declare the value of their shipment is below the U.S. de minimis value. The U.S. de minimis value is currently \$800, meaning goods valued at \$800 or less are exempt from formal customs procedures and can be imported into the United States duty-free, are not subject to taxes, and are less likely to be inspected by U.S. Customs and Border Protection. After learning more, how important is it, if at all, for the U.S. to prohibit certain countries that pose a threat to the following from being able to send foreign-made goods to the U.S. under the de minimis value? U.S. industries* 47

- 12 **Table CPA6_2:** *As a reminder, an importer of foreign-made goods can avoid paying duties, taxes, and minimize chance of inspection by U.S. Customs and Border Protection if they declare the value of their shipment is below the U.S. de minimis value. The U.S. de minimis value is currently \$800, meaning goods valued at \$800 or less are exempt from formal customs procedures and can be imported into the United States duty-free, are not subject to taxes, and are less likely to be inspected by U.S. Customs and Border Protection. After learning more, how important is it, if at all, for the U.S. to prohibit certain countries that pose a threat to the following from being able to send foreign-made goods to the U.S. under the de minimis value? American workers* 51

- 13 **Table CPA7:** *As a reminder, an importer of foreign-made goods can avoid paying duties, taxes, and minimize chance of inspection by U.S. Customs and Border Protection if they declare the value of their shipment is below the U.S. de minimis value. The U.S. de minimis value is currently \$800, meaning goods valued at \$800 or less are exempt from formal customs procedures and can be imported into the United States duty-free, are not subject to taxes, and are less likely to be inspected by U.S. Customs and Border Protection. After learning more, which of the following actions, if any, do you think U.S. Congress should take?* 55

14 **Summary Statistics of Survey Respondent Demographics** 60

Crosstabulation Results by Respondent Demographics

Table CPA1: As you may know, an importer can avoid paying duties, taxes, and minimize chance of inspection by U.S. Customs and Border Protection if they declare the value of their shipment does not exceed the U.S. 'de minimis value'. Currently, the U.S. de minimis value is \$800, meaning importers who declare their shipment is worth \$800 or less are exempt from formal customs procedures and can enter the country duty-free, are not subject to taxes, and are less likely to be inspected by U.S. Customs and Border Protection. Since 1995, Congress has increased the U.S. de minimis value from \$5 to \$800. Do you support or oppose Congress lowering the de minimis value?

Table CPA2_1: As a reminder, an importer of foreign-made goods can avoid paying duties, taxes, and minimize chance of inspection by U.S. Customs and Border Protection if they declare the value of their shipment is below the U.S. de minimis value. The U.S. de minimis value is currently \$800, meaning goods valued at \$800 or less are exempt from formal customs procedures and can be imported into the United States duty-free, are not subject to taxes, and are less likely to be inspected by U.S. Customs and Border Protection. How important is it, if at all, for the U.S. to prohibit certain countries that pose a threat to the following from being able to import foreign-made goods to the U.S. under the de minimis value?

Table CPA3: As a reminder, an importer of foreign-made goods can avoid paying duties, taxes, and minimize chance of inspection by U.S. Customs and Border Protection if they declare the value of their shipment is below the U.S. de minimis value. The U.S. de minimis value is currently \$800, meaning goods valued at \$800 or less are exempt from formal customs procedures and can be imported into the United States duty-free, are not subject to taxes, and are less likely to be inspected by U.S. Customs and Border Protection. Currently, an estimate of 2.7 million shipments per day enter the United States under the de minimis threshold. Which of the following actions, if any, do you think U.S. Congress should take?

Demographic	Increase the U.S. de minimis threshold for foreign-made goods so that more can be imported into the United States without having to pay tariffs or taxes, and be less likely to be inspected		Decrease the U.S. de minimis threshold for foreign-made goods so that less can be imported into the United States without having to pay tariffs or taxes, and be less likely to be inspected		Keep the U.S. de minimis threshold for foreign-made goods the same		Don't know/No opinion		Total N

Table CPA4_2: As a reminder, an importer of foreign-made goods can avoid paying duties, taxes, and minimize chance of inspection by U.S. Customs and Border Protection if they declare the value of their shipment is below the U.S. de minimis value. The U.S. de minimis value is currently \$800, meaning goods valued at \$800 or less are exempt from formal customs procedures and can be imported into the United States duty-free, are not subject to taxes, and are less likely to be inspected by U.S. Customs and Border Protection. How concerning, if at all, are the following statements?
 90% of intellectual property package seizures come through international mail, with 83% of these packages coming from China. The current U.S. de minimis value has allowed China to import a greater amount of goods into the United States with less likeliness of an inspection from U.S. Customs and Border Protection.

Table CPA4_4: As a reminder, an importer of foreign-made goods can avoid paying duties, taxes, and minimize chance of inspection by U.S. Customs and Border Protection if they declare the value of their shipment is below the U.S. de minimis value. The U.S. de minimis value is currently \$800, meaning goods valued at \$800 or less are exempt from formal customs procedures and can be imported into the United States duty-free, are not subject to taxes, and are less likely to be inspected by U.S. Customs and Border Protection. How concerning, if at all, are the following statements? In 2021, the United States hit a trade deficit of \$1 trillion, meaning the value of imports in the U.S. was \$1 trillion more than the value of exports resulting in the loss of American jobs. This deficit does not include foreign-made goods imported under the de minimis value because the U.S. government does not calculate the value of the 2.7 million shipments that are imported daily under the de minimis threshold.

Table CPA5: As a reminder, an importer can avoid paying duties, taxes, and minimize chance of inspection by U.S. Customs and Border Protection if they declare the value of their shipment does not exceed the U.S. 'de minimis value'. Currently, the U.S. de minimis value is \$800, meaning importers who declare their shipment is worth \$800 or less are exempt from formal customs procedures and can enter the country duty-free, are not subject to taxes, and are less likely to be inspected by U.S. Customs and Border Protection. Since 1995, Congress has increased the U.S. de minimis value from \$5 to \$800. Knowing more, do you support or oppose Congress lowering the de minimis value?

Table CPA6_2: *As a reminder, an importer of foreign-made goods can avoid paying duties, taxes, and minimize chance of inspection by U.S. Customs and Border Protection if they declare the value of their shipment is below the U.S. de minimis value. The U.S. de minimis value is currently \$800, meaning goods valued at \$800 or less are exempt from formal customs procedures and can be imported into the United States duty-free, are not subject to taxes, and are less likely to be inspected by U.S. Customs and Border Protection. After learning more, how important is it, if at all, for the U.S. to prohibit certain countries that pose a threat to the following from being able to send foreign-made goods to the U.S. under the de minimis value? American workers*
